PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1a (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1a.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

Kaliningrad Army Barracks Rozenau is located on the southeast outskirts of Kaliningrad, approximately 5 kilometers (km) south of Kaliningrad/Devau Airfield and 4 km west of Kaliningrad/Lugovoye Airfield (Figure 1).

The installation covers approximately 150 acres and contains 16 multistory barracks, 3 multistory barracks/administration buildings, 7 administration buildings, 16 vehicle storage/maintenance buildings, 11 storage buildings, and 12 support buildings. Adjacent to the east edge of the installation is an area containing tracked- and wheeled-vehicle driver-training courses. A 350-acre training area, probably associated with the installation, is 2 km south. The training area contains a tank/assault-gun firing range, a probable flat-trajectory firing range, and 2 areas of unidentified activity. Two roads connect the barracks and training areas (Figures

2 and 3).

Seven KEYHOLE missions of interpretable photography, from August 1961 to July 1964, were used in the preparation of this report. A comparison of the photography reveals no significant changes at the installation.

Analysis of photography indicates that there may be 2 different units billeted in the installation. There appears to be 1 type of barracks in the east portion and another type in the west portion. The barracks and large number of vehicle storage/maintenance buildings in the west portion, with adjacent driver-training areas and a training area to the south, suggest an armored unit. The eastern portion, which contains most of the supply buildings, a limited number of vehicle storage/maintenance buildings, U-shaped barracks, and an athletic field, suggests an infantry unit.

DESCRIPTION OF INSTALLATION

Railroad Service

The Kaliningrad-Gvardeysk rail line passes south of the installation. No rail spurs are visible in the vicinity.

Road Service

The streets of Kaliningrad serve the installation.

Administrative and Troop Housing Area

Area D contains 16 multistory barracks, 3 multistory barracks/administration buildings, 7 administration buildings, and 11 storage and 12 support buildings.

Other Buildings and Facilities

Area H1 probably contains dependents quarters.

Area H2 is an old fort which may be used for storage.

Equipment Storage/Maintenance Area

Eleven vehicle storage sheds, 2 vehicle maintenance buildings, one 500 by 70 feet and one 350 by 70 feet, and 3 vehicle storage buildings--one 280 by 50 feet, one 250 by 50 feet, and one 320 by 50 feet--are located in Area D.

Athletic Field

Area K is an athletic field.

Driver-Training Areas

Area M1 is an irregularly shaped closed-circuit tracked-vehicle driver-training course.

Area M2 contains a figure-8 wheeled-vehicle driver-training course and 2 probable

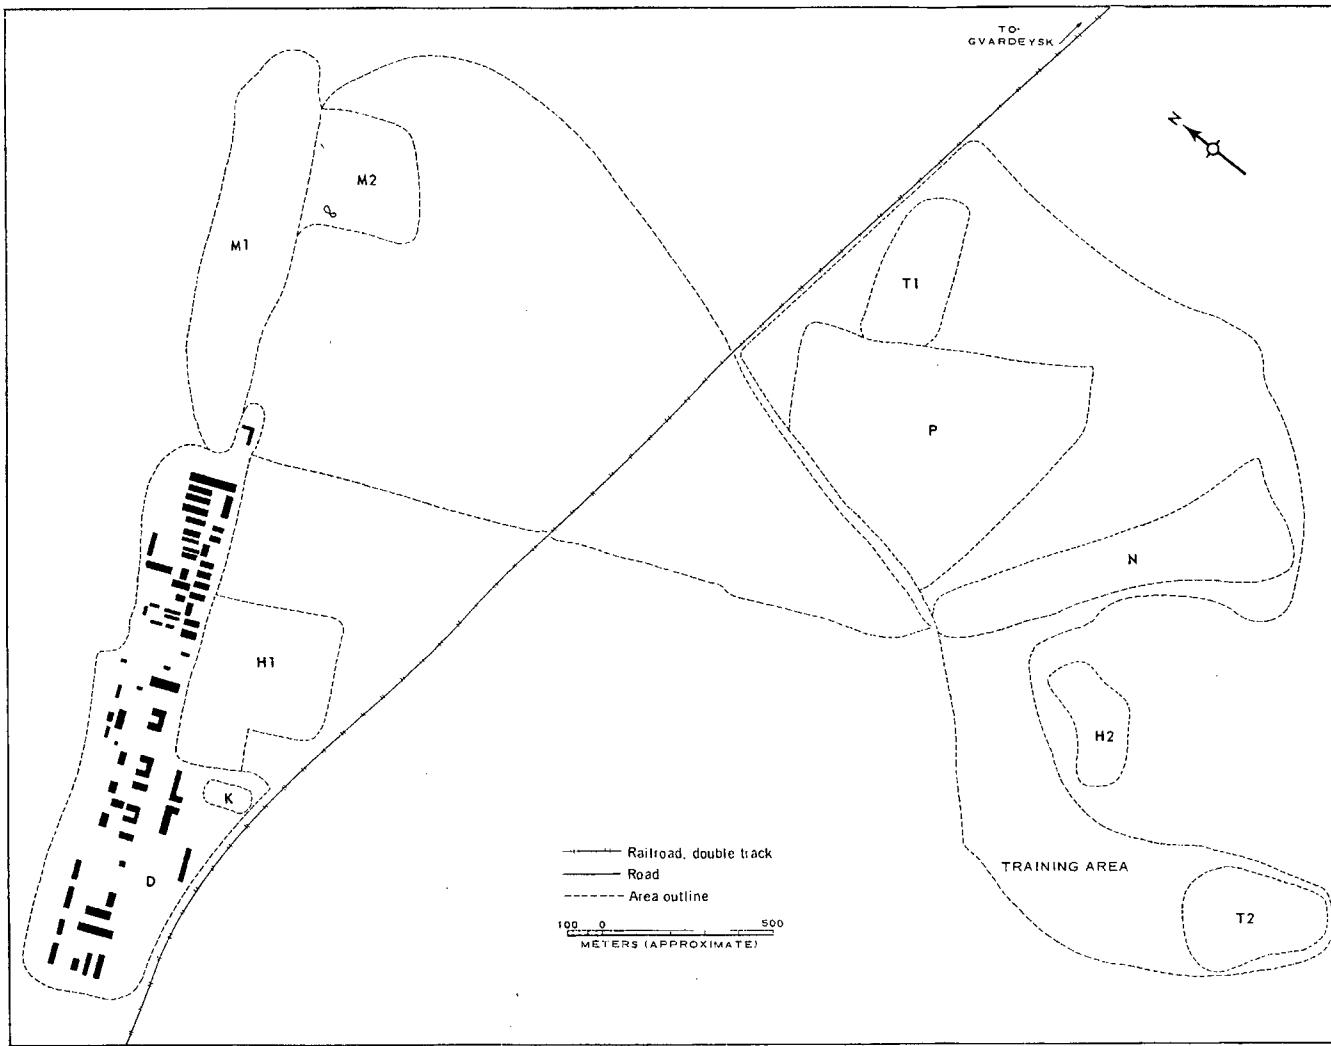

FIGURE 3. KALININGRAD ARMY BARRACKS ROZENAU. Sketch compiled from [redacted] June 1964.

driver-training tracks.

Tank/Assault-Gun Firing Ranges

Area N is a 3,400-foot tank/assault-gun firing range with two 1,800-foot lanes and 3 possible moving targets. Trackage indicates heavy usage of the tank lanes; however, there is very little ground scarring in the vicinity of the target area, indicating the range is not used very often or that it is used only for subcaliber firing.

Flat-Trajectory Firing Ranges

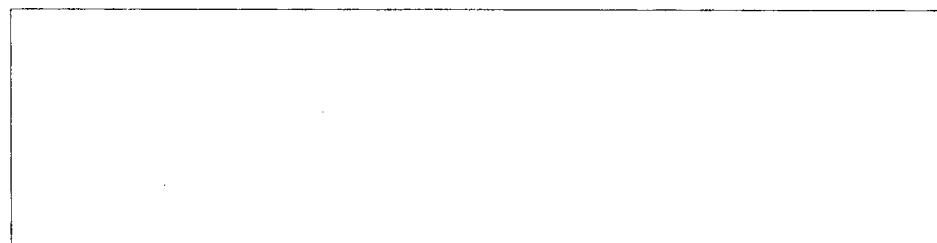

Area P is a 2,300-foot probable firing range

with several targets at varying distances. The firing line appears to have 3 circular areas-- one at each end and one in the center. The area in the vicinity of the targets does not reveal much usage.

Unidentified Facilities

Area T1 contains what appears to be a partially constructed road with 2 scarred areas leading from it.

Area T2 contains heavy ground scarring similar to that found on flat-trajectory firing ranges; however, no firing line is visible.
